Gentlemen:

The Commission has issued the enclosed Amendment No. 2¹ to Facility Operating License No. DPR-53 for Calvert Cliffs Nuclear Power Plant Unit No. 1. The amendment is in response to your applications dated July 6, 1976 and October 1, 1976, as supplemented by filings dated October 20 and 26, November 5 and 30, 1976, January 30 and 31, 1977, and March 2, 3 and 7, 1977, and earlier supportive filings dated July 9, 1975, July 21, 1975, March 4 and May 7, 1976.

The amendment (1) terminates NRC's June 17, 1976 "Order for Modification of License" which had placed an interim restriction on peak linear heat generation rate of 13.9 kw/ft, (2) authorizes power operation using Cycle 2 reload fuel including three new test assemblies, and (3) incorporates modified operating limits based on applications dated November 30, 1976 and March 2, 1977 and based on an acceptable emergency core cooling system evaluation model that conforms with Section 50.46 of 10 CFR Part 50.

Some of your proposed Technical Specification changes have been modified to meet our requirements. These modifications have been discussed with and accepted by your staff.

Copies of the Safety Evaluation and Environmental Impact Appraisal, and Notice of Issuance and Negative Declaration are enclosed.

Sincerely,

Respectfully,
Dennis L. Ziemann

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D. C. 20555

BALTIMORE GAS AND ELECTRIC COMPANY

DOCKET NO. 50-317

CALVERT CLIFFS UNIT NO. 1

AMENDMENT TO FACILITY OPERATING LICENSE

Amendment No. 21
License No. DPR-53

1. The Nuclear Regulatory Commission (the Commission) has found that:
 - A. The applications for amendment by Baltimore Gas and Electric Company (the licensee) dated July 6 and October 1, 1976, as supplemented by filings dated October 20 and 26, November 5 and 30, 1976, January 30 and 31, and March 2, 3 and 7, 1977, and earlier supportive filings dated July 9, 1975, July 21, March 4 and May 7, 1976, comply with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations set forth in 10 CFR Chapter I;
 - B. The facility will operate in conformity with the application, the provisions of the Act, and the rules and regulations of the Commission;
 - C. There is reasonable assurance (i) that the activities authorized by this amendment can be conducted without endangering the health and safety of the public, and (ii) that such activities will be conducted in compliance with the Commission's regulations;
 - D. The issuance of this amendment will not be inimical to the common defense and security or to the health and safety of the public; and
 - E. The issuance of this amendment is in accordance with 10 CFR Part 51 of the Commission's regulations and all applicable requirements have been satisfied.

2. Accordingly, the license is amended by changes to the Technical Specifications as indicated in the attachment to this license amendment and paragraph 2.C(2) of Facility License No. DPR-53 is hereby amended to read as follows and the provisions added by Commission Order for Modification of License dated June 17, 1976, are hereby terminated.

(2) Technical Specifications

The Technical Specifications contained in Appendices A and B, as revised through Amendment No. 21, are hereby incorporated in the license. The licensee shall operate the facility in accordance with the Technical Specifications.

3. This license amendment is effective as of the date of its issuance.

Attachment:
Changes to the Technical
Specifications

Date of Issuance: March 14, 1977

UNITED STATES NUCLEAR REGULATORY COMMISSION

DOCKET NO. 50-317

BALTIMORE GAS AND ELECTRIC COMPANY

NOTICE OF ISSUANCE OF AMENDMENT TO FACILITY
OPERATING LICENSE
AND
NEGATIVE DECLARATION

The U. S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 21 to Facility Operating License No. DPR-53, issued to Baltimore Gas and Electric Company (the licensee), which revised the license and its appended Technical Specifications for operation of the Calvert Cliffs Nuclear Power Plant Unit No. 1 (the facility) located in Calvert County, Maryland. The amendment is effective as of its date of issuance.

The amendment (1) terminated NRC's June 17, 1976 "Order for Modification of License" which had placed an interim restriction on peak linear heat generation rate of 13.9 kw/ft, (2) authorized power operation using Cycle 2 reload fuel including three test assemblies, and (3) incorporated modified operating limits based on applications dated November 30, 1976 and March 2, 1977 and based on an acceptable emergency core cooling system evaluation model that conforms with Section 50.46 of 10 CFR Part 50.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in

10 CFR Chapter I, which are set forth in the license amendment. Notice of Proposed Issuance of Amendment to Facility Operating License in connection with item (3) above was published in the Federal Register on December 13, 1976 (41 F.R. 54258). No request for a hearing or petition for leave to intervene was filed following notice of the proposed action on item (3) above. Prior public notice of items (1) and (2) above was not required since these items do not involve a significant hazards consideration.

In connection with items (1) and (2) above, the Commission has determined that these actions will not result in any significant environmental impact and that pursuant to 10 CFR §51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared. In connection with item (3) above, the Commission has prepared an environmental impact appraisal relating to the action and has concluded that an environmental impact statement for this particular action is not warranted because there will be no significant environmental impact attributable to the action.

For further details with respect to this action, see (1) the applications for amendment dated July 6, 1976 and October 1, 1976, and supplements thereto dated October 20 and 26, November 5 and 30, 1976, January 30 and 31, 1977 and March 2, 3 and 7, 1977, and

earlier supportive filings dated July 9, 1975, July 21, 1975, March 4 and May 7, 1976, (2) Amendment No. 21 to License No. DPR-53, and (3) the Commission's Safety Evaluation and Environmental Impact Appraisal. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N. W., Washington, D. C., and at the Calvert County Library, Prince Frederick, Maryland 20678, except for the proprietary documents for which nonproprietary versions are available. A copy of items (2) and (3) may be obtained upon request addressed to the U. S. Nuclear Regulatory Commission, Washington, D. C. 20555, Attention: Director, Division of Operating Reactors.

Dated at Bethesda, Maryland, this 14th day of March, 1977.
