MEMORANDUM TO: James Clifford, Chief, Section 2  
Project Directorate I  
Division of Licensing Project Management  
Office of Nuclear Reactor Regulation

FROM: Jacob I. Zimmerman, Project Manager, Section 2 **/RA/**  
Project Directorate I  
Division of Licensing Project Management  
Office of Nuclear Reactor Regulation

SUBJECT: MILLSTONE NUCLEAR POWER STATION, UNIT NO. 2, DOCKETING  
OF INFORMATION RELATED TO AMPACITY DERATING DUE TO  
THERMO-LAG (TAC NO. MA3392)

The attached information was provided by Northeast Nuclear Energy Company (NNECO) to the U.S. Nuclear Regulatory Commission to support the staff's review related to ampacity derating issues associated with Generic Letter 92-08, "Thermo-Lag 330-1 Fire Barriers." Attachment 1 is a memorandum to the Docket File from Daniel G. McDonald, dated April 20, 1998. This memorandum contains NNECO's draft response to a staff request for information dated May 13, 1997. Attachment 2 contains Engineering calculation number 96-ENG-01528-E2, Revision 2, "Ampacity Derating of Cables Due to Thermo-Lag" which was provided to the staff on May 25, 1999. The purpose of this memorandum is to docket Attachment 2 and make both attachments publically available.

Docket No. 50-336
