Dear Mr. Lundvall:

*SEE PROPOSED TECH SPECS CHANGE*

The Commission has issued the enclosed Amendment Nos. 105 and 86 to Facility Operating License Nos. DPR-53 and DPR-69 for Calvert Cliffs Nuclear Power Plant, Unit Nos. 1 and 2. These amendments consist of changes to the Technical Specifications in response to your application dated October 11, 1984. The amendments are effective as of July 1, 1985.

On February 22, 1985, the Commission issued Amendment Nos. 100 and 82 to Facility Operating License Nos. DPR-53 and DPR-69 for Calvert Cliffs Nuclear Power Plant, Unit Nos. 1 and 2. The supporting Safety Evaluation (SE) and Technical Evaluation Report (TER) addressed the Radiological Effluent Technical Specifications (RETS) proposed by BG&E in their application dated October 11, 1984. As requested, the Commission issued only one part of the RETS in Amendments 100 and 82. Specifically, in Amendments 100 and 82, we issued the Technical Specifications associated with the environmental monitoring program and deleted sections of the Appendix B TS which were no longer needed.

Consistent with BG&E's request in their application dated October 11, 1984, we herein issue the final part of the RETS. This completes action on the October 11, 1984 application. These TS consist of the radiological effluent requirements and administrative TS; changes in the environmental monitoring TS are also being undertaken to accommodate these new TS. We are also deleting the remainder of the Appendix B TS. All issues associated with these License Amendments are addressed in our Safety Evaluation dated February 22, 1985.

These amendments involve changes in the installation or use of facility components located within the restricted area as defined in 10 CFR Part 20 and changes in inspection and surveillance requirements. The staff has determined that the amendments involve no significant increase in the amount and no significant change in the types of any effluents that may be released offsite and that there is no significant increase in individual or cumulative occupational radiation exposure. The Commission has previously issued a proposed finding that these amendments involve no significant hazards consideration and there has been no public comment on such finding. Accordingly, the amendments meet the eligibility criteria for categorical exclusion set forth in 10 CFR §51.22(c)(9). Pursuant to 10 CFR §51.22(b), no environmental impact statement or environmental assessment need be prepared in connection with the issuance of the amendments.

PDR ADOCK 05000317  
P PDR

We have concluded, based on the considerations discussed above, that (1) there is reasonable assurance that the health and safety of the public will not be endangered by operation in the proposed manner, and (2) such activities will be conducted in compliance with the Commission's regulations, and the issuance of these amendments will not be inimical to the common defense and security or to the health and safety of the public.

The notice of issuance will be included in the Commission's next bi-weekly Federal Register notice.

Sincerely,

/S/

Edward J. Butcher, Acting Chief  
Operating Reactors Branch #3  
Division of Licensing

UNITED STATES  
NUCLEAR REGULATORY COMMISSION  
WASHINGTON, D. C. 20555

BALTIMORE GAS AND ELECTRIC COMPANY

DOCKET NO. 50-317

CALVERT CLIFFS NUCLEAR POWER PLANT UNIT NO. 1

AMENDMENT TO FACILITY OPERATING LICENSE

Amendment No. 105  
License No. DPR-53

1. The Nuclear Regulatory Commission (the Commission) has found that:
  - A. The application for amendment by Baltimore Gas & Electric Company (the licensee) dated October 11, 1984, complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations set forth in 10 CFR Chapter I;
  - B. The facility will operate in conformity with the application, the provisions of the Act, and the rules and regulations of the Commission;
  - C. There is reasonable assurance (i) that the activities authorized by this amendment can be conducted without endangering the health and safety of the public, and (ii) that such activities will be conducted in compliance with the Commission's regulations;
  - D. The issuance of this amendment will not be inimical to the common defense and security or to the health and safety of the public; and
  - E. The issuance of this amendment is in accordance with 10 CFR Part 51 of the Commission's regulations and all applicable requirements have been satisfied.

2. Accordingly, the license is amended by changes to the Technical Specifications as indicated in the attachment to this license amendment, and paragraph 2.C.(2) of Facility Operating License No. DPR-53 is hereby amended to read as follows:

(2) Technical Specifications

The Technical Specifications contained in Appendices A and B, as revised through Amendment No. 105, are hereby incorporated in the license. The licensee shall operate the facility in accordance with the Technical Specifications.

3. This license amendment is effective July 1, 1985.
