Dear Mr. Creel:

SUBJECT: CALVERT CLIFFS NUCLEAR POWER PLANT, UNIT NOS. 1 AND 2 - NOTICE OF WITHDRAWAL OF APPLICATIONS FOR AMENDMENTS (TAC NOS. 63353 AND 63354)

Enclosed is a copy of a "Notice of Withdrawal of Applications for Amendments to Facility Operating Licenses" for your information. This Notice relates to your October 17, 1986 application, as modified on November 25, 1987, which proposed to set the steam generator tube inservice inspection interval of Technical Specification (TS) Surveillance Requirement 4.4.5.3.a at 24-months and provide a maximum interval extension of 6 months (25%), in accordance with the provisions of TS 4.0.2.a, permitting a maximum interval of 30 months, vice the currently required 12-24 month inspection interval. In addition, you proposed 1) elimination of the inspection interval extension to 40 months, currently permitted by TS 4.4.5.3.a, for C-1 results in two consecutive steam generator tube inspections and 2) deletion of the interval reduction to 20 months, required by TS 4.4.5.3.b, for C-3 results during third sample inspections. Your letter of March 29, 1989 requested the withdrawal of these amendment requests.

This requested change was published previously in the Federal Register as a "Notice of Consideration of Issuance of Amendments to Facility Operating Licenses and Opportunity for Prior Hearing" (52 FR 10179) on March 30, 1987.

UNITED STATES NUCLEAR REGULATORY COMMISSION
BALTIMORE GAS AND ELECTRIC COMPANY
DOCKET NOS. 50-317 AND 50-318
NOTICE OF WITHDRAWAL OF APPLICATIONS FOR AMENDMENTS
TO FACILITY OPERATING LICENSES

The U. S. Nuclear Regulatory Commission (the Commission) has granted the March 29, 1989 request of the Baltimore Gas and Electric Company (the licensee) for withdrawal of Change No. 2a of the licensee's request for amendments, dated October 17, 1986 and modified on November 25, 1987, to Facility Operating License Nos. DPR-53 and DPR-69, issued to the Baltimore Gas and Electric Company (BG&E, the licensee) for operation of the Calvert Cliffs Nuclear Power Plant, Unit Nos. 1 and 2, located in Calvert County, Maryland.

The proposed amendments would change the Units 1 and 2 Technical Specifications (TS) as follows:

1. Modify the steam generator tube inservice inspection interval of TS 4.4.5.3.a by extending it from 12-24 months to a new interval of at least once per refueling interval, where a refueling interval would be defined as 24 months. In addition, the provisions of TS 4.0.2.a would now be applicable, thus permitting a maximum allowable interval extension of 25% (6 months) beyond the normally required 24-month period.
2. Delete the interval reduction to 20 months currently required by TS 4.4.5.3.b for C-3 results during third sample inspections.

DFOL

3. Eliminate the interval extension to 40 months permitted by TS 4.4.5.3.a, for C-1 results in two consecutive steam generator tube inspections.

The Commission issued a "Notice of Consideration of Issuance of Amendments to Facility Operating Licenses and Opportunity for Prior Hearing" which was published in the FEDERAL REGISTER (52 FR 10179) on March 30, 1987. No requests for hearing were filed regarding this Notice.

By letter dated March 29, 1989, the licensee withdrew its applications for the proposed amendments.
