SUBJECT: STOLEN PORTABLE GAUGE

DESCRIPTION:

On February 13, 2001, the Arizona Radiation Regulatory Agency (ARRA) notified Region IV by facsimile of a stolen portable gauge. The ARRA was informed by Ricker-Atkinson-McBee & Associates, that a Troxler Model 3440 (Serial No. 26981) portable gauge containing a 333 megabecquerel (9 millicurie) cesium-137 source and a 1.63 gigabecquerel (44 millicurie) americium-241/beryllium source had been stolen. The licensee informed the ARRA that the gauge had been stolen from the licensee's facility while locked and chained in the bed of a pickup truck. The lock was broken on the transport case and the gauge and scatter block was removed from the case. The licensee promptly notified the Phoenix Police Department. The ARRA also sent an inspector to the facility. The licensee is offering a \$500.00 reward for the return of the gauge.

The state of Arizona has informed the states of Utah, California, Colorado, New Mexico and the FBI.

Region IV received notification of this occurrence by facsimile from ARRA on February 13, 2001. The State also transmitted the facsimile report to the NRC Operations Center. Region IV has informed the OEDO, IAT, NMSS, OSTP and Region IV's SLO and PAO.

This information has been discussed with the State and is current as of 4:30 p.m. on February 13, 2001.
