

February 14, 2001

Mr. Frank Wilson
Operations Training Manager
Entergy Nuclear Northeast
Indian Point 3 Nuclear Power Plant
Bleakley and Broadway
Buchanan, NY 10511

SUBJECT: INDIAN POINT 3 - SUBMITTAL OF THE REACTOR OPERATOR AND SENIOR REACTOR OPERATOR WRITTEN EXAMINATIONS, QUALITY CHECKLISTS, SAMPLE PLANS AND OPERATING EXAMINATIONS

Dear Mr. Wilson:

The purpose of this letter is to submit exam materials developed by the NRC staff required for the Senior Reactor Operator and Reactor Operator initial written and operating licensing examinations for your review and comments. In addition, we have also provided the revised sample plan, quality checklists, and outlines for your information. The examination materials are being provided to support administration of the operator licensing examinations at the Indian Point 3 facility during the weeks of March 19th and March 26th, 2001. If exam reproduction is necessary to facilitate your review, we request that these copies be of limited number and sequentially numbered. In accordance with 10 CFR 55.49, you are required to control the exam for integrity purposes. Because this is preliminary examination material, the included information will be withheld from public disclosure until after the examination is complete.

Should you have any questions, during or after your review, please contact Mr. P. Bissett at (610) 337-5389. Otherwise, the NRC exam team will review and validate the exam during their site visit the week of February 20, 2001.

Sincerely,

/RA/

Richard J. Conte, Chief
Operational Safety Branch
Division of Reactor Safety

Docket No. 05000286
