

North Atlantic Energy Service Corporation P.O. Box 300 Seabrook, NH 03874 (603) 474-9521

The Northeast Utilities System

February 12, 2001

Docket No. 50-443 NYN-01010

CR 00-08123-02

United States Nuclear Regulatory Commission Attention: Document Control Desk Washington, D.C. 20555

> Seabrook Station Reporting of Changes to, or Errors In Emergency Core Cooling System Models or Applications

In accordance with the requirements of 10CFR 50.46(a)(3)(i), Enclosure 1 includes a tabulation of the current Large Break LOCA Peak Clad Temperature (PCT) margin utilization table applicable to Seabrook Station. The Large Break LOCA utilization table provides notification of a reduction in PCT value of more than 50 degrees F. The new Large Break LOCA PCT value of 1945 F° is 90 F° lower than the previous PCT value reported on August 30, 2000. The new PCT value reflects Seabrook Station's Cycle 8 core design and error adjustments as indicated in the enclosure. The enclosed Small Break LOCA utilization table is provided for completeness and is consistent with the table provided in North Atlantic's 2000 10CFR 50.46 Report, NYN-00077, dated August 2000.

Should you have any questions regarding this report, please contact Mr. James M. Peschel, Manager-Regulatory Programs at (603) 773-7194.

Very truly yours,

NORTH ATLANTIC ENERGY SERVICE CORP.

arges for

Ted C. Feigenbaum Executive Vice President and Chief Nuclear Officer

United States Nuclear Regulatory Commission NYN-01010 / Page 2

cc: H. J. Miller, NRC Region I Administrator
V. Nerses, NRC Project Manager, Project Directorate 1-3
R. K. Lorson, NRC Senior Resident Inspector
