Mr. Charles H. Cruse
Vice President - Nuclear Energy
Baltimore Gas and Electric Company
Calvert Cliffs Nuclear Power Plant
1650 Calvert Cliffs Parkway
Lusby, MD 20657-4702

SUBJECT: ISSUANCE OF AMENDMENTS FOR CALVERT CLIFFS NUCLEAR POWER PLANT
UNIT NO. 1 (TAC NO. M97363) AND UNIT NO. 2 (TAC NO. M97364)

Dear Mr. Cruse:

The Commission has issued the enclosed Amendment No. 227 to Facility Operating License No. DPR-53 and Amendment No. 201 to Facility Operating License No. DPR-69 for the Calvert Cliffs Nuclear Power Plant, Unit Nos. 1 and 2, respectively. The amendments consist of changes to the Technical Specifications (TSs) in response to your application transmitted by letter dated December 4, 1996, as supplemented by letters dated March 27, June 9, June 18, July 21, August 14, August 19, September 10, October 6, October 20, October 23, November 5, 1997, and January 12, January 28 and March 16, 1998.

The amendments convert the Current Technical Specifications (CTSs) for Calvert Cliffs Unit Nos. 1 and 2 to Improved Standard Technical Specifications (ISTS) consistent with the provisions of NUREG-1432, Revision 1, "Standard Technical Specifications, Combustion Engineering Plants," dated April 1995. In addition, the staff evaluated other TS changes included in the application for conversion to Improved Technical Specifications.

Further, the amendments add a new license condition 2.C.(6) reflecting the licensee's commitments regarding relocation of TS and license condition requirements to licensee-controlled documents, and add Appendix C to the Facility Operating License requiring compliance with those commitments. In approving the proposed action, we have relied upon the commitments described in Appendix C. These commitments were provided in your application and supplemental submittals and are to be implemented in accordance with License Conditions 2.C.(6) and Appendix C. You are requested to inform the staff in writing when these commitments have been implemented.

The Baltimore Gas and Electric Company (BGE) submittal of the Calvert Cliffs proposed conversion from CTS to the ITS was well organized and documented changes from the CTS to ITS. In response to NRC requests for additional information (RAIs), BGE provided replacement pages for the CTS, ITS, and documents associated with the changes. BGE also prepared reference lists of Calvert Cliffs approved and proposed license amendments, a list of technical specifications task force generic changes which were incorporated into the submittal, and cross-check reference lists between the CTS to ITS and ITS to CTS. BGE responded to NRC RAIs and worked with the staff to resolve staff questions and concerns associated with the conversion.
