**Comments to Draft Environmental
Assessment**

Dear Mr. Person:

There are several points in the review that although they will cause no change to the conclusion near clarification for the record. They are as follows;

Section 1.2	The average concentration is actually 27 pC/g.
Section 3.1	The average concentration is actually 27 pC/g.
Section 3.2	Final characterization was completed in 1995
	Average concentration at Washington is 80 pC/g
Section 6.0	It is anticipated that exposure to individuals offsite will be within US NRC guidelines.
Section 7.2.2.1	Average stream flow is estimated at 8000 gals/min.
Section 7.2.2.2	Four ground water monitoring wells have been installed in the area of the proposed storage site.
Section 7.2.2.3	The wells mentioned in this section have been installed.
Section 7.2.3	Will local zoning affect US NRC jurisdiction?

Sincerely,

John C. Daniels
Project Professional
