Docket No. 50-244

FEB 10 1981

Mr. John E. Maier
Vice President - Electric & Steam
Production
Rochester Gas & Electric Corporation
89 East Avenue
Rochester, New York 14649

Dear Mr. Maier:

The Commission has issued the enclosed Amendment No. 35 to Provisional Operating License No. DPR-18 for the R.E. Ginna Nuclear Power Plant, Unit No. 1. The amendment consists of changes to the Technical Specifications in response to your application notarized October 30, 1980 (submitted by letter dated November 4, 1980).

As discussed in a telephone conversation with your staff on December 23, 1980, reference to the Shift Technical Advisor has been deleted from the October 30, 1980 request. We mutually agreed upon this change. The addition of the Shift Technical Advisors (STAs) to the organizational chart resulted from your request notarized April 9, 1980 (submitted by letter dated April 11, 1980). This request was subsequently superseded in part by your application and letter of October 30, 1980 and November 4, 1980, respectively, and in part by another request notarized November 5, 1980 (submitted by letter dated November 13, 1980). This latter request deals with Three Mile Island Lessons Learned implementation items and includes changes to the organizational technical specifications related to the inclusion of the STAs. Although supersession of the April 9/April 11, 1980 submittal would ostensibly delete necessary changes to Figure 6.2-1 of the Ginna Technical Specifications to include the STA in the organization chart, we will review this addition as part of the November 5/November 13, 1980 submittal. Please inform us if you are not satisfied with this approach or if further changes are necessary.

The letter of October 30/November 4, 1980, upon which this amendment is based, revised certain provisions in Section 6 of Ginna Technical Specifications Appendix A to reflect changes in the corporate organizational structure. Specifically, the R.E. Ginna Nuclear Power Plant management organization chart (Figure 6.2-1) has been revised to reflect recent changes in the RG&E offsite organization. Two new positions of Senior Vice President have been created, Senior Vice President - General Services and Senior Vice President - Finance and Rates. Reporting to the former is the General Manager - Purchasing and Public Affairs. Reporting to the latter is the Vice

FEB 10 1981

President - Rates. The previous position of Chief Engineer has been changed to Vice President and Chief Engineer, reporting to the Executive Vice President who in turn reports to the President of Rochester Gas and Electric Corporation.

We have reviewed the above proposed changes to the Technical Specifications, reflecting the recent revisions of the management organization chart, and find these changes acceptable because they do not diminish the level of safety with respect to organization and technical resources provided by the existing Technical Specifications.

The organizational changes also meet the provisions of 18.7-1976/ANS-3.2 as endorsed by Regulatory Guide 1.33 and are, therefore, acceptable.

The amendment applies to the organizational structure and therefore, does not authorize a change in effluent types or total amounts nor an increase in power level, and will not result in any significant environmental impact. Having made this determination, we have further concluded that the amendment involves an action which is insignificant from the standpoint of environmental impact and pursuant to 10 CFR §51.5(d)(4) that an environmental impact statement, or negative declaration and environmental impact appraisal need not be prepared in connection with the issuance of the amendment.

Since the amendment applies to the organizational structure, it does not involve significant new safety information of a type not considered by a previous Commission safety review of the facility. It does not involve a significant increase in the probability or consequences of an accident, does not involve a significant decrease in a safety margin, and, therefore, does not involve a significant hazards consideration. We have also concluded that there is reasonable assurance that the health and safety of the public will not be endangered by this action and that the issuance of this amendment will not be inimical to the common defense and security or to the health and safety of the public.

A copy of the Notice of Issuance is also enclosed.

Sincerely

Dennis M. Crutchfield, Chief
Operating Reactors Branch #5
Division of Licensing

ROCHESTER GAS AND ELECTRIC CORPORATION

DOCKET NO. 50-244

R. E. GINNA NUCLEAR POWER PLANT

AMENDMENT TO PROVISIONAL OPERATING LICENSE

Amendment No. 35
License No. DPR-18

1. The Nuclear Regulatory Commission (the Commission) has found that:
 - A. The application for amendment by Rochester Gas and Electric Corporation (the licensee) notarized October 30, 1980 (submitted by letter dated November 4, 1980), complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations set forth in 10 CFR Chapter I;
 - B. The facility will operate in conformity with the application, the provisions of the Act, and the rules and regulations of the Commission;
 - C. There is reasonable assurance (i) that the activities authorized by this amendment can be conducted without endangering the health and safety of the public, and (ii) that such activities will be conducted in compliance with the Commission's regulations;
 - D. The issuance of this amendment will not be inimical to the common defense and security or to the health and safety of the public; and
 - E. The issuance of this amendment is in accordance with 10 CFR Part 51 of the Commission's regulations and all applicable requirements have been satisfied.

8102300 388

2. Accordingly, the license is amended by changes to the Technical Specifications as indicated in the attachment to this license amendment and paragraph 2.C(2) of Provisional Operating License No. DPR-18 is hereby amended to read as follows:

(2) Technical Specifications

The Technical Specifications contained in Appendix A, as revised through Amendment No. 35, are hereby incorporated in the license. The licensee shall operate the facility in accordance with the Technical Specifications.

3. This license amendment is effective as of the date of its issuance.

FIGURE 6.2-1

UNITED STATES NUCLEAR REGULATORY COMMISSIONDOCKET NO. 50-244ROCHESTER GAS AND ELECTRIC CORPORATIONNOTICE OF ISSUANCE OF AMENDMENT TO PROVISIONAL
OPERATING LICENSE

The U. S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 35 to Provisional Operating License No. DPR-18, to Rochester Gas and Electric Corporation (the licensee), which revised the Technical Specifications for operation of the R. E. Ginna Nuclear Power Plant (the facility) located in Wayne County, New York. The amendment is effective as of its date of issuance.

The amendment modifies the provisions of the Technical Specifications to incorporate changes in the offsite management organization.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

The Commission has determined that the issuance of this amendment will not result in any significant environmental impact and that pursuant to 10 CFR §51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of this amendment.

8102300 392

For further details with respect to this action, see (1) the application for amendment notarized October 30, 1980 (transmitted by letter dated November 4, 1980), and (2) Amendment No. 35 to License No. DPR-18, including the Commission's letter of transmittal. These items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and at the Rochester Public Library, 115 South Avenue, Rochester, New York 14627. A copy of item (2) may be obtained upon request addressed to the U. S. Nuclear Regulatory Commission, Washington, D. C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 10th day of February 1981.
