Docket No. 50-397

U.S. Nuclear Regulatory Commission
Document Control Desk
Mail Station P1-37
Washington, D.C. 20555

Subject: **COLUMBIA GENERATING STATION, OPERATING LICENSE NPF-21
FITNESS FOR DUTY SEMIANNUAL PERFORMANCE DATA REPORT
JULY 1 TO DECEMBER 31, 2000**

Pursuant to 10 CFR 26.71(d), enclosed is the Energy Northwest Fitness for Duty (FFD) Semiannual Performance Data Report for July 1 to December 31, 2000. The data has been analyzed. Although no program weaknesses were identified during this reporting period, Energy Northwest continues to take steps to enhance the FFD program.

Should you have any questions or desire additional information regarding this matter, please call me or D. W. Martin, Manager, Security Programs at (509) 377-8628.

Respectfully,

R. L. Webring (Mail Drop PE08)
Vice President, Operations Support/PIO

Short Term Contractors	0	1	1	0	0	0	0	0	0	0	0
Total	0	1	1	0	1	0	0	0	0	0	0

Totals show 3 confirmed positive test results.

**COLUMBIA GENERATING STATION
SIX MONTH PERFORMANCE DATA REPORT
July 1 to December 31, 2000**

FITNESS FOR DUTY PROGRAM SUMMARY

During the reporting period July 1 to December 31, 2000, the number of random tests performed was equivalent to the number required to test approximately 29.06 percent of the average eligible population. The rate of positive from random testing was 0.29 percent.

During the calendar year January 1 to December 31, 2000, the number of random tests performed was equivalent to the number required to test approximately 54.61 percent of the average eligible population. The annual rate of positive from random testing was 0.16 percent.

Blind samples were submitted in accordance with 10 CFR 26, Appendix B, Section 2.8(e) requirements, and all specimens were processed satisfactorily at our on-site testing and off-site HHS certified laboratories.

POSITIVE RESULTS

Three chemical tests yielded positive results during this reporting period.

MANAGEMENT ACTIONS

Pre-Access

Access was denied for two short-term contractor employees, who tested positive on pre-access analysis. Management was notified and the individuals' files were annotated of the positive result and management's actions.

Random

Access was removed as a result of one random drug test. One licensee employee, who tested positive during random testing, had their access removed for a minimum of fourteen days. The licensee employee was referred to the Employee Assistance Program for evaluation and treatment. Management was notified and the individual's file was annotated of the positive result and management's actions.

Follow Up

There were no follow-up positive test results during this reporting period. Presently, there is one licensee employee and one long-term contractor participating in the follow-up program

For Cause/Behavior

There were no positive test results for cause due to observable behavior testing during this reporting period.

For Cause/Post Accident

There were no positive test results for cause due to post accident testing during this reporting period. There were four tests administered for cause post event/accident, all with negative results. The events/accidents involved vehicle damage only and included:

- A vehicle accident between a company-owned and privately-owned vehicle at a four-way stop, damaging the privately-owned vehicle.
- A company-owned flatbed truck backed into another company-owned van, damaging the front grill and fender.
- A company-owned vehicle being operated in the Protected Area on a narrow surface was backed into a large yellow concrete pole, damaging the vehicle.
- A company-owned van was being backed out of a parking space in a supplier's parking lot off site and backed into the supplier's truck that was parked twenty feet behind the van.

There were no personal injuries involved in any of the vehicle accidents.

ADMINISTRATIVE ACTIONS

There were no administrative actions taken during this reporting period.

EVENTS REPORTED TO THE NRC

During this reporting period, there were no violations of the FFD program that were reportable.

PROGRAM WEAKNESSES

During this reporting period, the FFD program was reviewed by Quality in Audit AU-FD-00. A technical specialist from Omaha Public Power District assisted the QA team. No program weaknesses were found.

PROGRAM CHANGES

The FFD program welcomed a new contracted Medical Review Officer, Dr. William R. Clarke, during this reporting period. Dr. Clarke received his undergraduate degree from the University of Michigan and his medical degree from UCLA. After interning at the US Naval Hospital in Portsmouth, Virginia, he completed Navy flight surgeon school in Pensacola, Florida. He went on to a twenty-year career in the US Navy and Air Force. During his military career, Dr. Clarke held

numerous positions in aerospace medicine. His last assignment prior to his retirement from the Air Force was commander of the base hospital at England AFB, Louisiana. After retiring from the Air Force, Dr. Clarke obtained a law degree from the University of Richmond and was admitted to the Virginia Bar as an associate member. He practiced occupational medicine in Michigan for 3 years and in Alabama for 1½ years prior to relocating to Tri-Cities, Washington. He is also a certified independent medical examiner. Dr. Clarke's special medical interests include tropical medicine and public health, in which he holds a Masters degree from the Uniformed Services University of the Health Sciences. He also holds a Masters degree in international relations from the University of Southern California and is a Fellow of the American College of Preventative Medicine and the American College of Legal Medicine.
