UNITED STATES NUCLEAR REGULATORY COMMISSIONPOWER AUTHORITY OF THE STATE OF NEW YORKDOCKET NO. 50-333NOTICE OF WITHDRAWAL OF APPLICATION FORAMENDMENT TO FACILITY OPERATING LICENSE

The United States Nuclear Regulatory Commission (the Commission) has granted the request of Power Authority of the State of New York (the licensee) to withdraw its January 6, 1981 application for proposed amendment to the James A. FitzPatrick Nuclear Power Plant, located in Oswego County, New York. The proposed amendment would have modified the provisions in the Technical Specifications pertaining to four miscellaneous matters: the first change proposed to delete, from the Bases, the pressure setpoint for permissible entry into the Run mode, and to correct that setpoint in the Definitions to be consistent with the same setpoint in the corresponding Limiting Conditions for Operation; the second change proposed to correct an apparent error in the list of valve isolation groups which isolate on a high drywell pressure signal; the third change proposed to correct an error in the list of inputs to the Rod Worth Minimizer, and the fourth change proposed to correct specifications pertaining to the low Pressure Coolant Injection (LPCI) system that should have been modified as a result of a previously approved amendment involving the LPCI system. The Commission issued a Notice of Consideration of Issuance of Amendment published in the FEDERAL REGISTER on July 20, 1983 (45 FR 33086). By letter dated December 24, 1985, the licensee withdrew its application for the proposed amendment.
