Re: Application for Transfer and Amendment of Export Licenses

Reference: 1. Letter dated July 6, 2000 from Edward F. McDonough, Senior Administrator Export/Import Compliance, Westinghouse Electric Company LLC, to Ronald D. Hauber, Deputy Director, Office of International Programs USNRC.

Gentlemen:

This letter constitutes an application ("Application") for transfer and amendment of the export licenses identified in Attachment A (the "Licenses") currently held, in whole or in part, in the name of CE Nuclear Power LLC ("CENP"), a wholly-owned subsidiary of Westinghouse Electric Company LLC ("Westinghouse")¹. The Application requests that the Nuclear Regulatory Commission ("NRC") formally approve the transfer and amendment of the Licenses from CENP to its parent, Westinghouse.

By the letter noted in Reference 1, Westinghouse, on behalf of itself and its subsidiary CENP, clarified to the NRC the status of the Licenses and the export licenses held by Westinghouse. Reference 1 indicated that due to the acquisition of CENP as a wholly-owned subsidiary of Westinghouse, the NRC should consider the two companies as a single entity and allow each company to use the export licenses of the other company on an interchangeable basis.

The request for transfer and amendment of the Licenses submitted by this letter, subsequent to the submittal of Reference 1, is necessitated by the planned formal legal merger of CENP, including all of its assets and personnel, into its parent, Westinghouse, to be effective as of April 2, 2001. The merger is being undertaken as a final step in connection with Westinghouse's on-going efforts to integrate its recent acquisition of CENP into the existing Westinghouse commercial nuclear business. From and after the April 2, 2001 effective date of the merger, CENP will cease to exist as a legal entity and Westinghouse will remain as the sole surviving company. In addition, from and after the date of the merger, subject to all required NRC approvals, Westinghouse will be the sole remaining entity undertaking the licensed activities currently being undertaken by both Westinghouse and CENP under the Licenses.

¹ CENP became the holder of the Licenses as of April 28, 2000, in connection with the acquisition by British Nuclear Fuels plc ("BNFL"), in the United States through its wholly-owned subsidiary Westinghouse, of the world-wide nuclear business of ABB Ltd. ("ABB"). The acquisition included the outstanding shares of stock of ABB C-E Nuclear Power, Inc. ("ABBCENP"), the entity that, prior to the acquisition, conducted the U.S. nuclear business of ABB and held the Licenses. Upon the acquisition closing, ABBCENP merged into CENP, which became a wholly-owned subsidiary of Westinghouse and an indirect subsidiary of BNFL.

All NRC licensed activities under the Licenses will be the same before and after the contemplated merger of CENP into Westinghouse and the transfer and amendment of the Licenses. The transfer and amendment of the Licenses will not involve any change in the operating organization, location, facilities, equipment or procedures associated with the licensed activities; and there will be no changes in such licensed activities as result of the planned merger. All personnel having responsibility for licensed activities under the Licenses, as amended and transferred to Westinghouse, will be the same personnel who currently have responsibilities under the Licenses, as held by CENP. These personnel simply all will be employees of Westinghouse, instead of employees of Westinghouse or CENP. Westinghouse, a current holder of NRC export licenses, will continue to meet all requirements for an NRC licensee, including financial and technical qualifications. By virtue of the merger of CENP into Westinghouse, Westinghouse simply will remain as the license holder under, and sole user of, the Licenses.

Based on the foregoing, CENP requests that the NRC approve the transfer of the Licenses from CENP to Westinghouse effective as of April 2, 2001. It is further requested that the NRC approve amendments to the Licenses necessary to effectuate such transfer and to reflect Westinghouse as the licensee under the Licenses. The address for Westinghouse to be listed on the Licenses is: 4350 Northern Pike, Monroeville, PA 15146, Attn: E. F. McDonough. In addition, please note the need to further amend the six (6) XSNM licenses to include Canadian and Australian origin material and EURATOM obligated material. Also, as there is no longer a need for licenses: XCOM 1100, Amendment 2 (KRSKO) and XSNM 1753, Amendment 2 (Lungmen Units 1 & 2), please terminate these licenses. A check for \$2,520 is included with this letter to cover fees associates with those licenses to be transferred and amended.

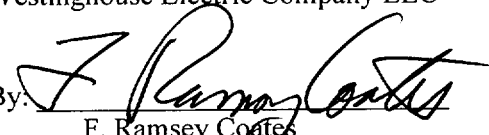

Westinghouse's agreement to, and acceptance of, the requested transfer and amendment of the Licenses and its agreement to assume responsibility for licensed activities thereunder is provided by the co-signature of its authorized representative on this Letter. Westinghouse also would appreciate the NRC adding the individuals on the attached list to the service list for correspondence related to the Application.

Should there be any questions regarding this matter, please contact the undersigned at 860/285-9780 or Lisa Campagna, Westinghouse Assistant General Counsel, at 412/374-4614.

Very truly yours,

Robert S. Bell, Jr.
Vice President, General Counsel and Secretary
CE Nuclear Power LLC
