

11/23/99

Meeting Farouk, J Hannon, and others:

- ~~Uncertainty~~
- ~~Cost public~~
- ~~ACRS concern~~
- ~~Finalizing report~~
- ~~Going into commission~~
- ~~Ru release~~

Farouk:

- 1) TH -- Results of 3D CFD calcs.
- 2) Consequence -- more realistic assessment.

Consequence Analysis

- We know certain conservatism in consequence analysis.
- Do you want this additional work?

Chris Boyd:

TH

- Qualitative results

B/34

NPR:

Consequence assessment:

- User need has been fulfilled.
- Ru - condition info.
- NO<sub>3</sub> release
- Zr hydride

Add things within time needed to respond to ARRS.

Addressing ARRS concerns ... can do this a little later.

I identify Areas for future research { - of conservation - of uncertainty }  
long

by Dec 10

answers in February, when go back to ARRS. (January 14)

Frank said OK & this.

J. Hermann's • BC interaction needed prior to issuing my memo.

FE/tawils • I agree
