U. S. Nuclear Regulatory Commission
Washington, DC 20555

ATTENTION: Document Control Desk

SUBJECT: Calvert Cliffs Nuclear Power Plant
Unit Nos. 1 & 2; Docket Nos. 50-317 & 50-318
License Amendment Request: Revision to Technical Specification 5.2.2.e,
"Organization – Unit Staff"

REFERENCES: (a) Letter from C. H. Cruse (CCNPP) to Document Control Desk (NRC),
dated December 21, 2000, same subject
(b) Letter from C. H. Cruse (CCNPP) to Document Control Desk (NRC),
dated February 12, 2001, same subject

In Reference (a), we requested a change to Technical Specification 5.2.2.e to allow future changes to specific overtime limits and working hours to be controlled in accordance with the provisions of our established procedure control process. In Reference (b), we attempted to make our change consistent with the wording of Technical Specification Task Force (TSTF)-258, Revision 3. Inadvertently, we did not include one sentence that was in the TSTF mark-up. We wish to amend our request to now include that sentence and make our request align to TSTF-258, Revision 4. The changed Technical Specification page is attached and supercedes the one provided in Reference (b). This change to the Technical Specification mark-up does not change the No Significant Hazards Determination in Reference (a).

TECHNICAL SPECIFICATION PROPOSED CHANGE

ATTACHMENT (1)

TECHNICAL SPECIFICATION PROPOSED CHANGE

Technical Specification 5.2.2 (current wording)

- e. The amount of overtime worked by unit staff members performing safety-related functions shall be limited and controlled in accordance with the Nuclear Regulatory Commission (NRC) Policy Statement on working hours (Generic Letter 82-12).

Change the wording below to:

- e. Administrative procedures shall be developed and implemented to limit the working hours of personnel who perform safety related-functions (e.g., licensed Senior Reactor Operators, licensed Reactor Operators, health physicists, auxiliary operators, and key maintenance personnel). The controls shall include guidelines on working hours that ensure adequate shift coverage shall be maintained without routine heavy use of overtime.

Any deviation from the above guidelines shall be authorized by the Plant General Manager or the Plant General Manager's designee, in accordance with approved administrative procedures and with documentation of the basis for granting the deviation. Routine deviation from the working hour guidelines shall not be authorized.

Controls shall be included in the procedures to require a periodic independent review be conducted to ensure that excessive hours have not been assigned.
