Julie,

I have attached the MACCS2 input and output files for my base case. I will try to contact you tomorrow to discuss.

Thanks.
Jason

Jason,

I am currently in preparation for a trip to Los Alamos, and will be back in the office on Thursday 10/21. We probably could discuss this in detail then. I would suspect the increase in the 0-500 mi population dose (with decreased source term inventory) is probably similar to the Cs-134 anomaly we discussed earlier. There may also be some increased dose in the foodchain pathway for similar reasons. I cannot make any better judgments without looking in more detail at the calculations. Touch base with me on Thursday or Friday.

Julie

Julie,

I have attached a request for MACCS User Assistance. Please call me when you are available. Thank you.

Jason
