

CT:

5/24/99

50 mile radius
Cincinnati

Is report-out safe? ← later

general conclusion:

due to energy response

- prompt fatalities is rapid response

- energy response depends on long term.

Very little effect due to radioactive

benefit is a

specific conclusion:

✓ • of level of 2 radiation in prompt fatalities ← put in cover

No change in soc dose and cancer, because x, y, z

cover letter

✓ • Pop density ← put in cover ltr

✓ • Effect of evacuation time ← put in cover memo

✓ • Cost risk of fallout — use #1's
a)
b)
c)

✓ Overall conclusion,

In terms of other response

Social dose is a fraction of 1000 m

In exposure of recent state codes.
