4 PAGES INCLUDING THE COVER SHEET

This is in regards to your request to amend your license for the use of intravascular brachytherapy. Please find enclosed a copy of the guidance that NRC HQ wants the regions to use in licensing these devices. The reason for my call was to ensure that the information you sent to us in your amendment request dated 12/7/00 is in accordance with NRC guidance. I would greatly appreciate your assistance in this matter by having Raymond review the enclosed guidance document with the material sent in your amendment request. Once he has reviewed this material, I would then like to get with him on the phone to ensure that we have everything we need to amend your license for this use. Thanks for assistance in this matter and I look forward to talking with Raymond soon.
