

AUG 31 1956

Lyall E. Johnson, Chief, Licensing Branch
Division of Civilian Application

Robert F. Barker, Isotopes Extension
Division of Civilian Application

APPROVAL OF NDA APPLICATION NUMBER N13 FOR BYPRODUCT MATERIAL

SYMBOL: CA:YE:RFB

It is recommended that a byproduct material license be issued as requested in application, dated August 18, 1956 from Nuclear Development Corporation of America. Approval is recommended with the understanding that Part 20 (as published) will be attached and all items set forth in their application will be considered conditions of the license. In this regard, it is understood from their application of November 25, 1955 that the irradiated units will not exceed 100 curies. Their statement on Page 9 of the August 18 application can be endorsed at this time "ultimate disposal by sea". It should be mentioned that this license does not constitute authority to dispose of wastes at sea. Additional information is necessary before such a license could be granted.
