

Paul D. Helms, Assistant Specialist
(Supervisor), Region I, Division of Compliance

April 20, 1965

Julius E. Lawrence, Radiation Specialist
Region I, Division of Compliance

SUBJECT: REMOVAL OF LICENSE FILES

During the period of March 25, 1965 to April 5, 1965 license files for which jurisdiction has been transferred to New York State, were reviewed and removed from the files for disposal as per L. D. Lawrence memorandum to regional directors dated January 12, 1965. Each file card corresponding to a license file removed during this period, has been stamped "File Destroyed" and dated April 5, 1965. File cards will remain in our file card index for possible future reference.

Approximately 7 1/2 linear feet of file space was recovered by destroying these records.

In addition to removing and destroying the above-mentioned files, all expired New York State Licenses that would have been turned over to the state had they been active at the time of the New York State takeover (October 15, 1962) were removed and destroyed. A list of these license is attached.

Approximately 1 3/4 linear feet of file-space was recovered by destroying these records.
