NRC FORM 173

(6-1998)

NRCMD 11.7

U.S. NUCLEAR REGULATORY COMMISSION

STANDARD ORDER FOR DOE WORK (SOEW)

ORDER NUMBER

60-00-215

DATE OF ISSUANCE

May 8, 2000

This agreement is entered into pursuant to the authority of the Energy Reorganization Act of 1974, as amended (42 U.S.C. 5801 et seq.). This work will be performed in accordance with NRC Management Directive 11.7. The parties agree that CICA does not apply to this transaction.

ISSUED TO: (DOE Office)

Mr. L. Douglas Rigdon, Director
Laboratory Programs Division
U. S. Department of Energy
P. O. Box 5400

ATTACHMENTS

THE FOLLOWING ATTACHMENTS ARE HEREBY MADE A PART OF THIS ORDER:

- ☐ STATEMENT OF WORK
☐ ADDITIONAL TERMS AND CONDITIONS
☒ OTHER (Specify)
Modification and Urgency Statement

SECURITY

- ☐ WORK ON THIS ORDER INVOLVES CLASSIFIED INFORMATION.
NRC FORM 187 IS ATTACHED.
- ☐ WORK ON THIS ORDER INVOLVES SENSITIVE UNCLASSIFIED,
UNCLASSIFIED SAFEGUARDS INFORMATION, OR UNESCORTED
ACCESS TO PROTECTED AND VITAL AREAS OF NUCLEAR POWER
PLANTS. NRC FORM 187 IS ATTACHED.
- ☒ WORK ON THIS ORDER IS UNCLASSIFIED AND NOT SENSITIVE.

FEE BILLABLE UNDER 10 CFR PART 170 ☐ YES ☒ NO

REMARKS: (At a minimum, reference the approved proposal (NRC Form 189) by number and date, and indicate if the attached statement of work modifies the DOE proposal):

REF: SOEW 60-00-147, dated 2/11/00 and 189 dated July 8, 1999.

The 189 is modified to reflect the addition of Task 7 to provide consultation and assistance in applying the MACCS code to evaluate the radiological consequences from reactor accidents and accidents involving spent fuel (see attached). The Urgency Statement is attached. The original and four copies of the revised 189 should be sent to the NRC/RES (ATTN: Marianne Riggs, T-10-D5) within 30 days.

CERTIFICATION OF FUNDS

This certifies that funds in the amount cited in Block A are available in the current FY 2000 allotment for work authorized by this SOEW.

MODIFICATION TO THE FORM 189 FOR JOB CODE W6352

GENERAL INFORMATION

TITLE: Probabilistic Consequence Model Methods Development JOB CODE: W6352
CONTRACTOR: SNL
SITE: Albuquerque
STATE: New Mexico

NRC PROJECT MANAGER: Jocelyn Mitchell (301)415-5289

PRINCIPAL INVESTIGATOR: Julie Gregory (505)844-7539

BUDGET ACTIVITY: 06015110120

WORK PERIOD: May 8, 2000 to May 31, 2000

The following change is proposed to the SNL Form 189 dated July 8, 1999:

Add the following task:

Task 7 -- Consequence Assessment Consultation and Assistance

The contractor will assist the NRC in the area of consequence assessment, as directed by the NRC project manager or other NRC personnel as requested by the NRC project manager. This task includes consultation and assistance in applying the MACCS code to evaluate the radiological consequences from reactor accidents and accidents involving spent fuel. This effort is to provide consultation and assistance within the constraints of the resources allocated.

Specific work to be performed under this task includes evaluating the effect of additional plume spreading on the radiological consequences of spent fuel pool accidents. The evaluation should include cases with and without early evacuation. The NRC will provide the MACCS input files to be used as the starting point for the evaluation. The contractor should revise the input files or code as necessary to simulate the plume spreading results of the expert elicitation which is documented in report NUREG/CR-6244. The Latin hypercube sampling capabilities developed for Task 5 should be used. Then, the contractor should run the revised input files or code to evaluate the effect of the additional plume spreading on the radiological consequences of spent fuel pool accidents. The results of the evaluation should be documented in a letter report by May 23, 2000. Additional analyses and reports will be specified by the NRC as needed.

Estimated level of effort: 1 staff-month

Estimated completion date: May 31, 2000

URGENCY STATEMENT

JOB CODE: W6352

TITLE: Probabilistic Consequence Model Methods Development

DOE LABORATORY: SANDIA NATIONAL LABORATORIES

SNL has developed and applied the MELCOR Accident Consequence Code System (MACCS) for evaluating consequences of operating reactor accidents and accidents involving spent fuel. The NRC has recently performed in-house calculations with MACCS to assess the radiological consequences of spent fuel pool accidents as part of the NRC effort to develop a rule for decommissioning reactors. The ACRS raised a number of technical issues with the rulemaking including the plume modeling in MACCS and suggested that the rulemaking be placed on hold until these issues are addressed. NRC in-house resources are committed to other high priority work. Further, the staff does not have in-house the codes that allow Latin hypercube sampling of uncertain parameters and post-processing of the results. Therefore, the subject modification (for SNL to address the issue of plume modeling in MACCS and its effect on offsite consequences) is urgently needed to help avoid schedule slippage of the ongoing rulemaking effort for decommissioning reactors.
