Subject: Address Spent Fuel Pool Decomm. tech. paper Public Comments

On Feb. 15th, 2000, the "Draft Tech. Study of SFP Accident Risk at Decomm. Plants," was released for public comment. The Union of Concerned Scientists commented that the NRC staff solicited comments with no intention of addressing them. To address all public comments in the final report, we compiled a list of ALL public comments raised and assigned each comment to a branch to address for the final report. We also photocopied and attached sections of transcripts, letters, emails that contained public comments so that you do not need to obtain the references. (unless you need/want more info.)

We are now ready to distribute the list of public comments so that you may respond accordingly.

The responses to the comments are **due to SPLB by July 7, 2000.**

I will come around beginning at 1:30 to hand deliver a copy to each of you. If you are not in your office, I will leave it in your mailbox. Call me (415-3610) if you have questions or comments about the package.

George Hubbard is out of the office on AL from 6/8/00 to 6/16/00. So contact Tanya Eaton at 415-3610 if you have comments/questions about the package. I will also be in tomorrow from 7:30 to 4:15.
