MEMORANDUM TO: Binesh K. Tharakan
Project Manager, General License Project
Materials Safety and Inspection Branch
Division of Industrial and Medical Nuclear Safety
Office of Nuclear Materials Safety and Safeguards

FROM: Anne T. Boland, Acting Chief /RA/
Materials Licensing/Inspection Branch 1
Division of Nuclear Materials Safety

SUBJECT: CASE RESOLUTION OF A GENERAL LICENSE FILE (RCODE 1201;
CLINCHFIELD COAL COMPANY, COEBURN, VIRGINIA)

This memorandum is in response to Temporary Instruction 2800/030, "VERIFICATION OF THE STATUS OF DEVICES AUTHORIZED FOR USE UNDER A GENERAL LICENSE."

An onsite inspection of the General Licensee was conducted on January 23, 2001, at the General Licensee's Moss #3 Preparation Plant, Route 615, Clinchfield, Virginia. During that inspection, the inspector concluded that four of the fixed gauges identified in Case File, RCODE No. 1201, Clinchfield Coal Company, Route 2, Moss #1, Coeburn, Virginia, have either been sent to the General Licensee's Moss #3 Preparation Plant, Route 615, Clinchfield, Virginia and/or the licensee's McClure River Preparation Plant, McClure, Virginia in 1990. The remaining Krypton-85 device could not be accounted for. Please refer to the enclosed forms for details on the transfer of the fixed gauges to the preparation plants.

If you have any questions regarding this matter, please contact Richard Gibson, Jr. at (404) 562-4745.
