March 29, 2001

SUBJECT: INDIAN POINT NUCLEAR GENERATING UNIT NO. 2 - REQUEST FOR  
ADDITIONAL INFORMATION REGARDING PROPOSED ADMINISTRATIVE  
CHANGES TO TECHNICAL SPECIFICATIONS (TAC NO. MA9033)

Dear Mr. Blind:

In a letter dated February 14, 2000, the Consolidated Edison Company of New York (Con Edison, the licensee) submitted an application for an amendment to the Technical Specifications (TSs) for Indian Point Nuclear Generating Unit No. 2. The proposed amendment would make administrative changes that, in part, correct listing and editorial errors, revise wording in certain TSs to correspond to wording used in applicable regulations, reflect actual level indication components, correct an organizational title change, and correct typographical and grammatical errors.

The U.S. Nuclear Regulatory Commission (NRC) staff is reviewing your submittal and has determined that additional information is required to complete its review. The specific information requested is addressed in the enclosure. In a telephone conversation on March 22, 2001, with representatives of your staff, the NRC staff discussed this information and obtained agreement that Con Edison would provide the additional information requested within 45 days of receipt of this letter.

If you have any questions regarding this matter, please contact me at (301) 415-1457.

Sincerely,

*/RA/*

Patrick D. Milano, Senior Project Manager

REQUEST FOR ADDITIONAL INFORMATION

TECHNICAL SPECIFICATION ADMINISTRATIVE CHANGES

INDIAN POINT UNIT 2

In a letter dated February 14, 2000, Con Edison requested several administrative changes to the Indian Point Unit 2 Technical Specifications (TSs). The following additional information is required to complete our review.

1. TS Table 3.6-1 and Table 4.4-1

Con Edison proposed to modify TS Table 3.6-1 and Table 4.4-1 to include non-automatic containment isolation valves IIP-500 through IIP-507. According to TS Basis Section 3.6, the valves listed in Table 3.6-1 are to be closed under post-accident conditions according to plant procedures. Con Edison stated that the proposed change had no effect on the plant operating or emergency procedures. Clarify whether the above valves are listed in the appropriate plant operating and emergency procedures.

2. TS Section 6.12.1

Con Edison proposed to revise TS Section 6.12.1, "Control of Access to High Radiation Areas," by replacing an outdated reference to 10 CFR 20.203(c)(2) with references to 10 CFR 20.1601(a) and 10 CFR 20.1601(b). However, TS 6.12.1, does not fully agree with the requirements in the revised regulation. Con Edison should either request NRC approval of alternative methods for controlling access to high radiation areas in accordance with 10 CFR 20.1601(c) or provide revised wording in TS 6.12.1 to reflect that used in the Standard Technical Specification (NUREG-1431, Vol. 1, Rev. 2) Section 5.7, "High Radiation Area."
