Author zation All international activities are based upon legal authority set forth in statutes, Executive Orders, Presidential Decision Directives, Multilateral U.S. Government Commitments, Agency-to-Agency Exchange Agreements and the like. -- Atomic Energy Act of 1954, as amended; 1978 Nuclear Non-Proliferation Act; Cooperative Threat Reduction Act; the Freedom Support Act; Early Notification and Assistance in Accident Conventions; et.al

Description The NRC maintains a program of international nuclear safety activities in support of U.S. domestic and foreign policy interests in the safe, secure, and environmentally acceptable use of nuclear materials, energy, and in nuclear nonproliferation, as well as in support of NRC's public health and safety and national security mandates. Cooperation with foreign countries in the area of nuclear safety provides a considerably larger operational expenence base than exists in the U.S. alone enables the NRC to identify and resolve safety issues in an economical manner, and supports and enhances nuclear safety worldwide. The NRC participates in a wide range of mutually beneficial programs

IAWG An wal Submissions

Page 2 of 8

involving information exchange with counterparts in the international nuclear community. NRC currently maintains arrangements with regulatory authorities in 34 countries. These arrangements provide communications channels that ensure the prompt reciprocal notification of power reactor safety problems that could affect both U.S. and foreign power plants. They are an important component of NRC's public health and safety and national security mandate, and provide the foundation for bilateral cooperation with other nations in nuclear safety, physical security, materials control and accounting, waste management, environmental protection, and other areas to which the parties agree. Finally, they establish the means through which the NRC provides health and safety information and assistance to other countries attempting to develop or improve their regulatory organizations and their overall nuclear safety cultures. In addition to its program of bilateral cooperation with other countries, NRC also works closely in the area of nuclear safety with organizations such as the International Atomic Energy Agency (IAEA)in Vienna, Austria, and the Nuclear Energy Agency (NEA) of the Organization for Economic Cooperation and Development (OECD)in Paris, France. Regional Programs New Independent States of the Former Soviet Union NRC conducts programs with Russia, Ukraine, Armenia, and Kazakhstan. These programs have been funded through interagency agreements between NRC, the Defense Threat Reduction Agency (DTRA), and the U.S. Agency for International Development (USAID)0.0NRC coordinates a range of safety and safeguards assistance and some cooperative activities as appropriate to develop and strengthen independent nuclear regulatory authorities through training, information exchanges, cooperative efforts, and through purchasing of equipment. Central and Eastern Europe NRC also conducts programs with Hungary, Czech Republic, Slovak Republic, Bulgaria, and Lithuania. These programs have been funded through interagency agreements between NRC and USAID. NRC coordinates a range of safety assistance and some cooperative activities, as appropriate, to develop and strengthen independent nuclear regulatory authorities through training, information exchanges, cooperative efforts, and through purchasing of equipment. Advanced Nuclear Countries The NRC ensures cooperation with advanced nuclear countries through bilateral regulatory exchange arrangements and international visits. These exchanges obtain information on foreign regulatory approaches and operational experience that will assist NRC's domestic nuclear regulation. NRC also participates in activities to enhance domestic and global nuclear safety, both through bilateral and multilateral organizations such as the International Atomic Energy Agency (IAEA) and the Nuclear Energy Agency (NEA) 0.0 Developing Nations NRC conducts a range of safety and safeguards assistance and cooperative activities with countries with less well-established nuclear programs in Asia, Latin America, and Africa for the purpose of developing and strengthening independent nuclear regulatory authorities through training, information exchange, and cooperative efforts.

Cate fories All or a major portion of the reported program/activity is:

academic

X designed to impart professional training and/or experience designed as an observational experience or study tour research (cither academic or non-academic)

The reported program/activity falls under one or more of the following specialized categories:

X Scientific/Technological

Defense/Mil:tary

Cultural

Rule Of Law

Program The nature of the reported program/activity can be briefly characterized as: Piature

National The Department of State, through its International Affairs Strategic Plan, has identified In erests several fundamental objectives that directly affect Americans. Many programs implemented by the U.S. Government may serve a number of national interests. The reported program/activity serves the following rational interests:

X National Security

Regional Stability

Weapons of Mass Destruction

Economic Prosperity

Open Markets

U.S. Exports

Global Growth and Stability

Economic Development

American Citizens and Borders

American Citizens

Travel and Immigration

Law Enforcement

International Crime

Illegal Drugs

Counterterrorism

Democracy and Human Rights

Humanitarian Response

Global Issues -- Environment, Population and Infectious Disease

Environment

Population

#### Health

The reported program/activity also serves the following national interests other than those listed

X Scientific/Technical/Energy/Engineering/Regulatory systems for peaceful uses of nuclear energy. (Common Defens

MEMORANDUM FOR JANICE DUNN LEE
DIRECTOR, OFFICE OF INTERNATIONAL PROGRAMS
NUCLEAR REGULATORY COMMISSION

Subject: FY 2000 Inventory of International Exchanges and Training Activities of the United States Government

Each year, per Presidential and Congressional mandate, the Interagency Working Group (IAWG) on United States Government-Sponsored International Exchanges and Training produces a comprehensive inventory of U.S. Government-sponsored international exchanges and training programs. I am writing to ask your support in this endeavor.

The involvement of talented representatives from the Nuclear Regulatory Commission, who each year bring their experience and insight to this difficult task, is critical to the success of this cooperative interagency effort. We hope that you and your colleagues will work with us again to develop the FY 2000 Inventory in a timely fashion and with the same spirit of mutual cooperation. I have attached the FY 1999 Inventory of Programs for your reference.

With the growing emphasis on greater efficiency and the elimination of duplication throughout government, as reflected in the Government Performance and Results Act (GPRA), this data provides increasingly valuable assistance in the analysis and coordination of USG-sponsored international exchanges and training. The IAWG's mandates define international exchanges and training activities as the movement of people between countries to promote the sharing of ideas, to develop skills, and to foster

UNCLASSIFIED

#### UNCLASSIFIED

-2-

mutual understanding and cooperation, financed wholly or in part, directly or indirectly with U.S. Government funds. However, the IAWG encourages federal organizations also to report programs and activities that do not involve movement of people across borders but advance these themes. Examples of such programs include government-sponsored in-country training and distance learning activities. Programs or activities which promote the sharing of ideas, development of skills, and mutual understanding need not to have been originally or solely designed for that purpose to be included in this data.

For the FY 2000 data collection effort, the IAWG will use its improved FEDS/www data collection system. This is an interactive web-based data collection and reporting system that enables users to submit information on programs to the IAWG via the Internet. Representatives from the Nuclear Regulatory Commission were invited to attend a demonstration of this software on November 14, 2000. IAWG staff liaisons have been in contact with representatives at the Nuclear Regulatory Commission to distribute start-up instructions and electronic security information for the system. This system can also be used by your agency to organize, manage, and report data from its international exchanges and training activities.

In order to meet the requirements of the legislation and Executive Order 13055, a deadline of March 1, 2001 has been set for submission of FY 2000 data to the IAWG.

I chair the Interagency Working Group. Its Executive Committee includes representatives from the Departments of Defense, Education, and Justice; the United States Agency for International Development; the National Security Council; and the Office of Management and Budget. Two of the many responsibilities charged to the Working Group are to improve the data collection process, initially authorized under Section 229 of the Foreign Relations Authorization Act, Fiscal Years 1994 and 1995 (Public Law 103-235) and Executive Order 12048 (1978), and to develop a comprehensive inventory of international exchanges and training activities of the United States Government. To learn more about the Working Group and to review its reports, please visit the IAWG's website at www.iawg.gov.

#### UNCLASSIFIED

Thank you for your continued cooperation and assistance with this project.

William B. Bader Chair, IAWG

(Assistant Secretary for Educational and Cultural Affairs, U.S. Department of State)

Enclosure:

As stated.

# Interagency Working Group (IAWG) FY 2000 Report on International Exchanges and Training Activities of the U.S. Government

## FEDS/www 2.0

## DATA REPORTING WORKSHEET FOR U.S. GOVERNMENT ORGANIZATIONS

Reporting Deadline: March 1, 2001

#### **General Program/Contact Information**

Please provide the following data, per the attached instructions:

Department/Agency:			·
Office:			
World Wide Web Address:	•		
Program's Full Name:			
Mailing Address:			
Contact Person/Title:			
Talanhone:	Fax <sup>.</sup>	E-Mail:	

#### **Program Authorization**

Please provide a reference to or explanation of the authorization for the reported program (legislation, mandate, agreement, etc.)

#### Program Description (not to exceed 300 words)

Please provide an overview of the reported program that includes:

- -- Program/rationale (include average duration of activity)
- -- Goals and objectives
- -- Summary of accomplishments for FY 2000

## [ Please attach a separate sheet of paper containing the Program Authorization and Description.]

Program Category	
1) All or a major portion of the program	activity is: (check all that apply)

Scientific/Technological Defense/Military	Cultural Rule of Law (includes law enforcement and administration of justice)

#### **National Interests**

**National Interest** 

The Department of State, through its International Affairs Strategic Plan, has identified several fundamental objectives that directly affect Americans. Many programs implemented by the U.S. government may serve a number of national interests. Please identify national interests (as many as apply) served by the program. For every national interest that you select, check the strategic objective(s) that apply. A description of each of the following national interests appears in the attached *Instructions*.

Strategic Objective

National Security	Regional Stability
	Weapons of Mass Destruction
Economic Prosperity	Open Markets
	U.S. Exports
•	Global Growth and Stability
	Economic Development
American Citizens and Borders	American Citizens
	Travel and Migration
Law Enforcement	International Crime
	Illegal Drugs
	Counterterrorism
Democracy and Human Rights	N/A
Humanitarian Response	N/A
Global Issues	Environment
	Population
	Health
The Department of State recognizes that	the list of National Interests above is not all-inclusive.
Please indicate below if the reported prog	gram serves a National Interest other than those listed
(e.g., Advancement of Science, Foundation	on or trust).
