

REGULATORY DOCKET FILE COPY

OCT 9 1980

DOCKET NO. 50-220

Niagara Mohawk Power Corporation
ATTN: Mr. Donald P. Dise
Vice President - Engineering
300 Erie Boulevard
Syracuse, New York 13202

Gentlemen:

We have received a copy of a "Petition To Amend A Confirmatory Order" which is notarized June 30, 1980, and was filed with the Office of Nuclear Reactor Regulation (ONRR) for review. The request was for approval to operate Nine Mile Point Unit 1 without the recirculation pump trip (required by the NRR's February 21, 1980 Order) until its next refueling outage. Fees pursuant to 10 CFR 170.22 did not accompany your request.

Based on information provided by the ONRR staff as a result of a preliminary review of your request, it has been determined that it involves consideration of a single safety issue. As such it requires a Class III fee of \$4,000 which should be remitted to this office promptly. If the final review by the ONRR staff reveals that this fee is incorrect, your company will be refunded any overpayment or be billed for any additional amount due.

For your information, the June 30 request is not considered to be exempt from fees under the provision of Footnote 2 of 10 CFR 170.22.

Sincerely,

Original Signed by
Wm. O. Miller

William O. Miller, Chief
License Fee Management Branch
