Millstone Nuclear Power Station, Unit No. 3
Response to a Request for Additional Information
Technical Specifications Change Request 3-6-00
Fuel Handling Accidents and Ventilation Systems
Use of NUREG-1431 - TSTF-287, Rev. 5

In a letter dated June 29, 2000,⁽¹⁾ several changes to the Millstone Unit No. 3 Technical Specifications were proposed. Many of the proposed Technical Specification changes were associated with revised fuel handling accident analyses. Additional changes based on NUREG-1431,⁽²⁾ TSTF-287, Rev. 5 were included to address loss of Control Room and Fuel Building boundary integrity. During a conference call with the Nuclear Regulatory Commission conducted on March 16, 2001, the use of TSTF-287, Rev. 5 was discussed. The proposed changes related to the Control Room and Fuel Building boundary integrity incorporate all of the technical changes identified in TSTF-287, Rev. 5, which Dominion Nuclear Connecticut, Inc. (DNC), proposes to adopt for Millstone Unit No. 3. Therefore, DNC requests approval of the proposed boundary integrity changes.
