4/13/99

Cindy Falkers - Nuclear Information -
Dose assessment concerns.

Natl. Medical Library

German study says 9 mrem leads to elevated
leukemia frequency.

Raymond Chattis - Friends of The Coast
NE Coalition on Pollution

Maine Yankee Decommission Decommission Panel

c. Public confidence -

NRC reports ^{say} 300, 700, 100 days of latent heat to cause a cyclical
fire.

Sabotage - prob. is hard to calculate. NRC may have
underestimated risk. M. Yankee removed the Jersey Bump barriers
around the fuel pool building.

Sy Weiss ^{response} 5/20/99 - EP - letter said the DG on a
trailer is too heavy to move + make it a missile when a
tornado. Took a month to respond.

4/8/97 Jean Lee letter - 40 pg memo 2/4/97 - will be
addressed by 4/8/97. No ans yet to the 40 pg memo.

11/30/90 Mike Majumdar from A. Bless (nuclear advisor on safety in
Oregon). Mike says how to handle anti-nuke crowd.

Sold plants on basis of safety, redundancy, diversity
If now safe, why change? Industry may become less safe.

RI decommission from start to license termination

* EPA ~~values~~ values are a risk-informed rule.

* Insurance industry - see if they'll reduce prem given
risk is less.

NEL Mike M - Some ^{decommission} plants have security plans that make the
SFP building non-vital at X-days after shutdown.

Lynette Hendricks - Dir Plant Support (NEI)

Mike Mairner - limited pot of \$ at decommissioned plants.

John O'Lo~~o~~ Duke ~~Power~~ Engineering and Services

Tom O'Hara

Paul Gunther - what about Coby event in Japan.
+ Northfield event.

Paul Blanch - risk is reduced

1. NR-1353 - has shortcomings. Only 90 days, property damage.

NR-CK 6451 - Brookhaven - ~~Seismic~~ good report

No discussion of sabotage.

but 72 requires SAR.

Kay Chattis -

David Lockbaum - UCS -

Should look at other events than seismic.

Skeptical about numbers in PRAs.

Peter Aperton - public citizen - Fire protection issues raised 20 yrs.
ago. Used to work at NRC.

1. What about criticality problems?

2. What about aging effects on seismic events.

3. Some SFPs leak.

4.

John Z -
