

12/22/99

To Tom L. Sakay
+ Rich B.

WHAT DO WE NEED?

- * Provide a quantified risk analysis like the loss of cooling case previously supplied by Soli. The writeup should be well written with a complete description of all events, success criteria, assumptions, references, etc. with all dependencies documented.
- * Provide backup sheets for the HRA analysis.
- * Provide ETs and FTs.
- * Provide summary of ET findings.
- * Products supplied MUST be in Wordperfect.

The product we receive should be essentially ready to be added to a paper to the NRC Commissioners as an appendix explaining the requantified risk assessment of decommissioning plants.

B/230

Jan 28th to Gary

What do I need from Tim
When do I need it.

What add people here?

~~Job~~

document dependencies
well written; full description;
all references; id word perfect.
use loss of cooling; use as a model.

- 1) quantified risk, anyl like loss of cooling case w/ complete desc. of all events, success criteria, assumption.
- 2). backup sheets for HRA.
- 3). ETs TFTs
- 4) Summed up:

~~Backup sheets for HRA~~

* draft as they complete them.

Glenms:

Tim called. He says that is a 70 page report that explains everything. Tim will see what he can do to get it re-transmitted.
