Subject: TAC Number for your effort

One of the action items out of this morning's kickoff meeting was a TAC number for this effort.

I have opened up TAC number MB1003. This has a PA code of 331 which is in the Waste Arena, therefore you will need to identify all hours you charge to this TAC to the clerk that does your time and attendance so the hours can be separately documented in your T&A .

Please go into WISP and try to use this TAC to make sure that it is available to you. Sometimes there are glitches when multiple offices are using the same TAC. Let me know if WISP won't allow you to charge your time to this TAC.

PS: I also promised you the ADAMS number for the recent NEI paper on the spent fuel pool thermal-hydraulics and ruthenium release fractions: ML010110343
