MEMORANDUM TO: Stuart A. Richards, Director
Project Directorate IV & Decommissioning
Division of Licensing Project Management
Office of Nuclear Reactor Regulation

FROM: L. Raynard Wharton, Project Manager, Section 2
Project Directorate IV & Decommissioning /RA/
Division of Licensing Project Management
Office of Nuclear Reactor Regulation

SUBJECT: SUMMARY OF MEETING HELD ON DECEMBER 6, 2000, WITH THE
WESTINGHOUSE OWNERS GROUP (WOG) ON LIMITED SCOPE
HIGH BURNUP LEAD TEST ASSEMBLIES (LTAs)

On December 6, 2000, representatives of the Westinghouse Owners Group (WOG) met with the NRC staff to discuss the WOG Topical Report WCAP-15604-NP, Revision 0, "Limited Scope High Burnup Lead Test Assemblies and LTA Programs." The attachment contains the list of meeting attendees. Copies of the slides used during the meeting are available under ADAMS accession number ML010860432.

The meeting began with introductions of the participants. The WOG opened the meeting with an overview of the LTA report. The purposes for developing the report and the benefits of a structured process for LTAs were discussed. There was also discussion of how the topical report review would be conducted and how implementation would occur. The staff stated that prior to accepting the report for review, a number of issues would need to be addressed; however, the WCAP could serve as a starting point.

At the conclusion of the meeting, it was agreed that the staff would provide written comments concerning the WCAP (transmitted by letter dated January 25, 2001). The WOG would then determine whether it could address the comments and would notify the NRC of the schedule for addressing the comments.
