**Subject:** inspectors - decommissioning

Gareth -

I checked with projects on resident inspectors. Here's the information I received from Dick Dudley...

In general, they do not have full-time resident inspectors.

Vince Everett, RIV, has inspected many (all?) of the decommissioned plants in Region IV (and former Region V) at various times of their decommissioning. Dick says he would be a good resource if we want short-term and long-term decommissioning activities. (Branch Chief: Ron Bellamy)

Bill Raymond, Region I, received special permission to stay as a full time resident inspector for 2 - 3 years after Haddam Neck shut down. He was there when they were making a lot of the equipment changes at the plant. (Branch Chief: Blair Spitzberg)
