Subject: TAC number for INEEL/PNNL/Sciencetech Contracts

Good morning,

For the INEEL, PNNL, and Sciencetech contracts that we are setting up (or have already set up) in support of decommissioning, the TAC No. that the contractor will need for billing purposes is MA5099, "Develop risk-informed basis for revised decommissioning regs".

On the SOW's, no TAC's were identified since they were to be determined. You don't need to change any paperwork right now, but just keep this information on hand for the future.

Tanya
