MEMORANDUM TO: Joseph Giitter, Chief  
Enrichment Section  
Special Projects Branch  
Division of Fuel Cycle Safety  
and Safeguards, NMSS

FROM: Andrew Persinko, MOX Project Manager  
Enrichment Section  
Special Projects Branch  
Division of Fuel Cycle Safety  
and Safeguards, NMSS

SUBJECT: SUMMARY OF MEETING: UNITED STATES - RUSSIAN SPECIAL  
JOINT WORKING GROUP ON REGULATORY MATTERS IN  
PLUTONIUM MANAGEMENT AND DISPOSITION (MARCH 13-15, 2001)

As the Nuclear Regulatory Commission (NRC) representative on the United States (U.S.)-Russian Special Working Group on Regulatory Matters in Plutonium Management and Disposition (working group), I participated in the third meeting of the working group on March 13-15, 2001, in Washington, D.C. The working group was created by, and reports to, the U.S.-Russian Joint Steering Committee on Plutonium Management and Disposition to ensure that the regulatory and licensing perspectives and requirements are taken fully into account in the work of the Steering Committee's other joint technical working groups. The working group is co-chaired by J. David Nulton of the Department of Energy (DOE) and Dr. Andrey Kislov of the R.F. Gosatomnadzor (GAN). The Record of the meeting is provided as an attachment.

At the meeting, the working group reviewed the second level licensing roadmaps, dictionaries, and schedules developed by the U.S./Russian technical working groups for plutonium conversion and disposition. The goal of the roadmaps is to ensure that there is a framework for GAN, an independent regulatory authority, to verify that regulatory and licensing requirements and perspectives have been fully reflected in the Russian Disposition Program as well as in plans for facility design, construction, and operation.

The working group concluded that the current documentation provided a good framework on which to proceed with more detailed Russian plutonium disposition program plans and schedules and only minor modifications are needed. These conclusions are discussed in the attachment.
