Mr. Earl G. Wright
Radioisotope Licensing Branch
Division of Fuel and Material Safety
United States Nuclear Regulatory Commission
Washington, D.C. 20555

Dear Mr. Wright:

Subject: Source Material License
Control No. 00669

Please withdraw our application for a Source Material License, Control No. 00669. We have reviewed our exploration requirements and believe that there will be no problem in complying with the requirements of a General License as stated in 10CFR 40.22. We will not possess more than 15 pounds of source material at any one time and not process more than 150 pounds total in any one calendar year.

Yours truly,

R. L. Bleifuss
Division Chief
