Norcross, GA 30092

SUBJECT: REVISED SCHEDULE FOR REVIEW OF NAC-UMS MAINE YANKEE  
AMENDMENT (TAC NO. L23217)

Dear Mr. Thompson:

By application dated October 17, 2000, as supplemented December 7, 2000, you requested an amendment to Certificate of Compliance No. 1015 for the NAC-UMS Universal Storage System. The application requests that additional components associated with spent fuel assemblies and up to 24 uncanistered damaged fuel rods per Transportable Storage Canister be allowed as approved contents for Maine Yankee.

By letter dated March 20, 2001, you modified the date for submittal of your response to the Staff's Request for Additional Information (RAI) dated January 22, 2001. The original date for submittal of the response was March 26, 2001, and the modified date requested is May 1, 2001. This is to inform you that the schedule for review of this amendment has been revised based on your modified submittal date. It is expected that this schedule will continue to be reviewed and updated periodically as key milestones are reached and, as necessary, to appropriately reflect the Nuclear Regulatory Commission's (NRC) casework prioritization.

Please note that the revised NAC-UMS Maine Yankee amendment review schedule relies on the completeness and accuracy of your application, as supplemented. The NRC identification of any technical issues during the completion of our technical review may have an impact on the schedule. To better serve your needs and those of our other stakeholders, we request in writing any further NAC requested changes to this schedule.

If you have any questions regarding this matter, you may contact me at 301-415-3711.

Sincerely,
