SUBJECT: STAFF REQUIREMENTS - AFFIRMATION SESSION, 10:25  
A.M., TUESDAY, APRIL 24, 2001, COMMISSIONERS'  
CONFERENCE ROOM, ONE WHITE FLINT NORTH,  
ROCKVILLE, MARYLAND (OPEN TO PUBLIC ATTENDANCE)

I. SECY-01-0039 - Final Rule to Amend 10 CFR Part 2, Subpart J, in Regard to the  
Licensing Support Network

The Commission approved a final rule amending 10 CFR Part 2, Subpart J. The final rule amends the Commission's Rules of Practice applicable to the use of the Licensing Support Network (LSN) for the licensing proceeding on the disposal of high-level waste at a geologic repository. The amendments establish the basic data structure and transfer standards ("design standards") that LSN participant websites must use to make documentary material available, clarifies the authority of the LSN administrator to establish guidance for LSN participants on how to best meet the design standards and to review participant designs for compliance with the standards, and clarifies the timing of participant compliance certifications.

Following incorporation of the changes described in the attachment, the Federal Register notice should be reviewed by the Rules Review and Directives Branch in the Office of Administration and forwarded to the Office of the Secretary for signature and publication.

SECY-01-0039 identifies a compatibility issue associated with the adjudicatory docket and ADAMs concerning single-image and multi-image TIFF images. OGC should keep the Commission informed of the resolution of this and of any other serious compatibility issues that may emerge.

## Comments and Changes to the Final Rule in SECY-01-0039

### General Comments

1. The rule should be amended to link the requirement for DOE to make its documents publicly available to the timing of DOE's submission of its application to the NRC pursuant to the Nuclear Waste Policy Act (NWPA) § 114(b).
2. The Federal Register notice uses the description of "submission of the application" to refer to the timing of two different events. The first use of the phrase refers to the timing of DOE's tendering of its application to the NRC pursuant to NWPA § 114(b). The second use of the phrase refers to the docketing of the application, which serves as the starting point for measuring the time the Commission has to issue a final decision approving or disapproving the issuance of a construction authorization pursuant to NWPA § 114(d). Whenever the timing of an activity is linked to "submission of the application," the Federal Register notice should be revised to indicate whether the reference is to the tendering of an application pursuant to NWPA § 114(b) or the docketing of the application pursuant to NWPA § 114(d). The Federal Register notice should make it clear that the two dates may be different, and that the Commission's interpretation of "submission" for purposes of NWPA § 114(d) does not affect the interpretation of "submission" for purposes of NWPA § 114(b). OGC should review the usage of the words "submission" and "submits" in the Statement of Considerations and in the final rule language, to be sure the terms are used consistently and explained appropriately, or to determine whether another term may be more appropriate to avoid confusion.
3. The Federal Register notice should make it clear that DOE is responsible for meeting both the 6-month LSN rule for making documents available prior to submitting its application pursuant to section 114(b), and its obligation to timely submit its application pursuant to the deadlines set in that section.
