**Millstone Nuclear Power Station, Unit Nos. 1, 2 and 3**  
**Updated Criminal History Check Points Of Contact**

Pursuant to 10 CFR 73.57, a licensee is required to have a program for performing criminal history checks of individuals granted unescorted access to a nuclear power facility or having access to Safeguards Information. The U.S. Nuclear Regulatory Commission (NRC), Division of Facilities and Security, maintains a list of designated contacts for criminal history check information for all licensed facilities.

On March 9, 2001,<sup>(1)</sup> the NRC issued a letter stating that the staff had completed its review and issued an Order to approve the transfer of the Millstone Nuclear Power Station, Unit Nos. 1, 2 and 3, to Dominion Nuclear Connecticut, Inc. (DNC), subject to the conditions described therein. On March 31, 2001,<sup>(2)</sup> the NRC issued amendments to the operating licenses for Millstone Nuclear Power Station, Unit Nos. 1, 2 and 3, finalizing the transfer. The purpose of this letter is to update the NRC criminal history check contact list to reflect the necessary changes.

Formerly, the Northeast Utilities corporate security organization provided centralized processing and administration of the Fitness For Duty (FFD) and Access Authorization

(AA) Programs for the Millstone Nuclear Power Station. In anticipation of completion of the sale of the Millstone Nuclear Power Station, the FFD/AA Program administration functions, formerly performed by the corporate security organization, were transferred to the security organization at the Millstone Nuclear Power Station.

With completion of the sale of the Millstone units to DNC, the information on this list of designated contacts for criminal history check information for the Millstone Nuclear Power Station needs to be updated. It is requested that the company name listed be changed from the 'Northeast Nuclear Energy Company' to 'Dominion Nuclear Connecticut, Inc.' The title of the address of the licensee should be changed from the 'Millstone Nuclear Power Station' to the 'Millstone Power Station.' Also, 'P. O. Box 128' should be changed to 'Rope Ferry Road' as the use of the Post Office box is being discontinued. The updated criminal history check primary and alternate points of contact for the Millstone Nuclear Power Station, Unit Nos. 1, 2 and 3, should then read as stated in Attachment 1.

Updating the database to include the above contact information will ensure that correspondence regarding these criminal history checks will reach the appropriate individuals.

There are no regulatory commitments contained within this letter.
