Change No. 9
License No. DPR-16

Jersey Central Power & Light Company
ATTN: Mr. R. H. Sims, Vice President
Madison Avenue at Punch Bowl Road
Morristown, New Jersey 07960

50-219

Gentlemen:

Your letter dated November 22, 1971, submitted a proposed change to the Technical Specifications of Provisional Operating License No. DPR-16 for the Oyster Creek Nuclear Power Plant Unit No. 1. The proposed change would allow continued operation at 50% power with the oxygen content of the containment atmosphere above 5 volume percent for an additional 24 hours over that specified in Section 3.5.A.6 of the Technical Specifications.

Based on our review of the proposed change, we have concluded that implementation of the change will not present significant hazards considerations not described or implicit in the Safety Analysis Report and that there is reasonable assurance that the health and safety of the public will not be endangered by operation in the manner proposed.

Accordingly, pursuant to Section 50.59 of 10 CFR Part 50, the Technical Specifications of Provisional Operating License No. DPR-16 are hereby changed as follows:

On page 3.5-1 of the Technical Specifications add the following to the first sentence of paragraph 3.5.A.6:

"except that between 2:11 A.M., November 23, 1971 and 2:11 A.M., November 24, 1971, the reactor may be operated at power levels up to 50% of rated with O₂ in the primary containment greater than 5%."

NOV 22 1971

This change to the Technical Specifications shall be deleted as
of 2:12 A.M., November 24, 1971.

Sincerely,

Donald J. Skovholt
Assistant Director
for Reactor Operations
Division of Reactor Licensing
