

April 25, 2001

Mr. L. W. Myers  
Senior Vice President  
First Energy Nuclear Operating Company  
Beaver Valley Power Station  
Post Office Box 4  
Shippingport, Pennsylvania 15077

SUBJECT: RESPONSE TO REQUEST FOR INITIAL OPERATING LICENSE  
EXAMINATIONS SCHEDULE CHANGE - BEAVER VALLEY POWER  
STATION, UNITS NO. 1 AND 2

Dear Mr. Myers:

This reply letter is in response to your letter (L-01-033) dated April 12, 2001, First Energy Nuclear Operating Company (FENOC) requesting a postponement and rescheduling of licensing examinations at Beaver Valley Units 1 and 2. The Unit 2 examinations will be administered during the week of May 28, 2001. The Unit 1 examination validation will be conducted during the week of July 30, 2001 and the Unit 1 examinations will be administered during the week of August 6, 2001. This letter constitutes revised 120 day letters for the respective examinations.

For Unit 1, to meet the above schedule, it will be necessary for your staff to furnish the examination outline by June 4, 2001. The written examinations and operating tests will be due for Unit 2 by May 3, 2001, and for Unit 1 by July 2, 2001. Pursuant to 10 CFR 55.40(b)(3), an authorized representative of the facility licensee shall approve the outlines, examinations and tests before they are submitted to the NRC for review and approval. All materials should be complete and ready-to-use. Any delay in receiving the required examination or the submittal of inadequate or incomplete materials, may cause the examinations to be rescheduled.

In order to conduct the requested written examinations and operating tests, it will be necessary for your staff to provide adequate space and accommodations in accordance with ES-402, and to make the simulation facility available on the dates noted above. In accordance with ES-302, your staff should retain the original simulator performance data (e.g., system pressures, temperatures, and levels) generated during the dynamic operating tests until the examination results are final.

Mr. L. W. Myers

-2-

Appendix E of NUREG-1021 contains a number of NRC policies and guidelines that will be in effect while the written examinations and operating tests are being administered.

To permit timely NRC review and evaluation, your staff should submit preliminary reactor operator and senior reactor operator license applications (Office of Management and Budget (OMB) approval number 3150-0090), medical certifications (OMB approval number 3150-0024), and waiver requests (if any) (OMB approval number 3150-0090) at least 30 days before the first examination date. If the applications are not received at least 30 days before the examination date, a postponement may be necessary. Signed applications certifying that all training has been completed should be submitted at least 14 days before the first examination date.

This letter contains information collections that are subject to the *Paperwork Reduction Act of 1995* (44 U.S.C. 3501 et seq.). These information collections were approved by the Office of Management and Budget, approval number 3150-0018, which expires on April 30, 2003.

The public reporting burden for this collection of information is estimated to average 500 hours per response, including the time for reviewing instructions, gathering and maintaining the data needed, writing the examinations, and completing and reviewing the collection of information. Send comments on any aspect of this collection of information, including suggestions for reducing the burden, to the Information and Records Management Branch (T-6 F33), U.S. Nuclear Regulatory Commission, Washington, DC 20555-0001, or by Internet electronic mail at [SLF@NRC.GOV](mailto:SLF@NRC.GOV); and to the Desk Officer, Office of Information and Regulatory Affairs, NEOB-10202, (3150-0101), Office of Management and Budget, Washington, DC 20503.

The NRC may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

Thank you for your cooperation in this matter. Mr. Schwartz has been advised of the policies and guidelines referenced in this letter. If you have any questions regarding the NRC's examination procedures and guidelines, please contact Mr. J. Caruso at (610) 337-5389 for Unit 2 or Mr. T. Fish at (610) 337-5369 for Unit 1, or myself at (610) 337-5183.

Sincerely,

*/RA/*

Richard J. Conte, Chief  
Operational Safety Branch  
Division of Reactor Safety
