Dear Mr. Finfrock:

The Commission has issued the enclosed Amendment No. 53 to Provisional Operating License No. DPR-16 for the Oyster Creek Nuclear Generating Station in response to your submittal dated July 28, 1980, as revised January 7, 1981.

The amendment modifies License No. DPR-16 to include a requirement to implement a guard training and qualification plan in accordance with 10 CFR 73.55(b)(4) within 60 days and all security personnel qualified within two years of this approval by the Commission.

We have completed our review and evaluation of the Oyster Creek Nuclear Guard Training and Qualification Plan and have concluded that the plan for your facility, when fully implemented, will meet the objectives of the specific requirements of 10 CFR 73.55(b)(4) and Appendix B to 10 CFR 73. We, therefore, further conclude that your Guard Training and Qualification Plan is acceptable.

Changes which would not decrease the effectiveness of your approved Plan may be made without approval by the Commission pursuant to the authority of 10 CFR 50.54(p). A report containing a description of each change shall be furnished to the Director, Office of Nuclear Reactor Regulation, U. S. Nuclear Regulatory Commission, Washington, D. C. 20555, with a copy to the appropriate NRC Regional Office within two months after the change is made. Records of changes made without Commission approval shall be maintained for a period of two years from the date of the change.

This amendment applies to the Guard Training and Qualification Plan and, therefore, does not authorize a change in effluent types or total amounts nor an increase in power level, and will not result in any significant environmental impact. Having made this determination, we have further concluded that this amendment involves an action which is insignificant from the standpoint of environmental impact and pursuant to 10 CFR 51.5(d)(4) that an environmental impact statement, or negative declaration and environmental impact appraisal need not be prepared in connection with the issuance of this amendment.

FEBRUARY 11 1981

Since this amendment applies to the Guard Training and Qualification Plan, it does not involve a significant decrease in the probability or consequences of an accident, does not involve a significant decrease in a safety margin, and, therefore, does not involve a significant hazards consideration. We have also concluded that there is reasonable assurance that the health and safety of the public will not be endangered by this action and that the issuance of this amendment will not be inimical to the common defense and security or to the health and safety of the public.

We will continue to withhold your Guard Training and Qualification Plan and related materials from public disclosure in accordance with the provisions of 10 CFR 2.790(d).

A copy of the Notice of Issuance is also enclosed.

Sincerely,
