Discussion Topics:

1. *Plant Status and Inspector Insights*

The resident inspectors provided a summary of plant activities. Both units were operating at full power. An anti-nuclear demonstration occurred today at the plant. Plant activities were not affected by the demonstration. The licensee continues to work on the backlog of post-restart of condition reports, corrective maintenance jobs, and engineering modification packages. The licensee is also continuing work on resolving problems affecting secondary side equipment.

2. *Present End-of-Cycle Summary Document*

Mr. Passehl presented the end-of-cycle performance summary. The Panel held extensive discussion on issues discussed in the summary.

3. *Map End-of-Cycle Activities*

The Panel held extensive discussion on the upcoming schedule of activities related to the end-of-cycle performance summary. Mr. Passehl took action to schedule the next meeting of the Panel during the week of May 7, 2001.
