Subject: Re: BNL

Jason Schaperow is in the process of running MACCS cases for spent fuel fire. He input data from 4982 (this report included the CRAC2 [predessor to MACCS] input file). I've contacted the person at BNL (Rich Davis) who ran MACC for 6451. He is trying to retrieve the data for me but it is looking like he won't be getting it any time soon.

I Don't think that getting the 6451 is critical (more of a good to have, might save us some time and might be usefull for some comparisons)

I don't need any further help on this but thanks for your efforts
