Subject: TWG schedule

As a reminder to those who were at the meeting with Tim yesterday and for those who were not at the meeting, Tim's current schedule for the TWG report is to have the report to the EDO on **September 15**. This schedule is subject to change if NEI provides new seismic data that needs to be evaluated at the August 23th meeting. However, we are not aware of any new information they plan to provide. Therefore, we expect the September the 15th date to remain valid. This means that the report should be provided to Gary for review on **August 31**. This means our time is short so don't slow down. Inputs and writeups are needed ASAP.

So that you are aware of all the things going on, the following activities are scheduled or being scheduled.

Monday, August 14, 2000 - Phone call with FEMA to discuss their views of the Feb 15 draft report.

Wednesday, August 23, 2000 - Meeting with NEI to discuss their seismic concerns.

Wednesday, September 6, 2000 - Briefing with Commissioner McGaffigan on the status of decommissioning rulemaking.

Wednesday, September 20, 2000 - Briefing with the ACRS Fuels Subcommittee on the status/conclusions of our efforts on the TWG report.

Wednesday, September 27, 2000 - NEI meeting with Sam Collins to discuss decommissioning issues.

If you have any questions let me know.
