**Comments on NRC Draft Regulatory Guide DG-1087,
"Evaluating the Habitability of a Nuclear Power Plant Control Room during a
Postulated Hazardous Chemical Release"**

1) Section 3.4 - Control Room Air Flow:

In the last sentence of this section, replace the word "particulate" with "toxic substance" since not all toxic chemicals are particulate.

2) Section 4.1 - Detection System:

For clarity, a statement should be added to state "Where no specific threat from toxic gas has been identified, no toxic gas detection systems are required."
