MEMORANDUM TO: Stephen Dembek, Chief, Section 2
Project Directorate IV-2 and Decommissioning
Division of Licensing Project Management
Office of Nuclear Reactor Regulation

FROM: L. Raghavan, Senior Project Manager, Section 2
Project Directorate IV-2 and Decommissioning
Division of Licensing Project Management
Office of Nuclear Reactor Regulation

SUBJECT: ACCESSION NUMBERS FOR TRACKING AND CLOSURE OF STAFF
ACTIONS RELATING TO SENSITIVE ALLEGATION-TYPE ACTIVITIES

A member of the public wrote several letters to the Office of Inspector General (OIG) in which the individual alleged several safety concerns at the San Onofre Nuclear Generating Station. OIG forwarded these letters to the Office of Nuclear Reactor Regulation (NRR) for evaluation and disposition, and requested NRR to treat them as "sensitive" documents. These letters were not placed into ADAMS and, therefore, did not have accession numbers. This resulted in the NRR staff's inability to identify the accession numbers for incoming documents in the WISP program and leads to WISP data error. The purpose of this memorandum is to document this deficiency. This document will be placed in the public document room and into ADAMS and the accession number of this document will be input into WISP for applicable activity to eliminate the WISP data error.
