Ronald Hauber, Director
NonProliferation, Exports & Multilateral Relations
Office of International Programs
US Nuclear Regulatory Commission
Washington, DC 20555

Dear Mr. Hauber,

In my letter dated October 5, 1999, I promised you a confidential report that portrays the fundamentals of our nuclear program. In the process of finalizing the report, and due to the volume of information contained in the report, we have found it necessary to divide the report into three (3) separate documents. We should be able to make the first one available to you very soon. The document is approximately twenty (20) days behind schedule, as I promised the document mid-November. Please accept my sincere apologies on the delay.

The divisions of the report will be as follows:

- First Report - DBI Reactors; History, Description, and Models of Analytical Basis
- Second Report - The application of the first report for plants below 2 MW
- Third Report - The application of the first report for plants between 2 ½ and 50 MW

Respectfully submitted,

H. A. Dauvergne

cc: J. Michael Doster, PhD.
