Subject: Spent Fuel Pool Exemptions

Mark Rubin/Glen Kelly: As a followup to your presentation on Risks for Spent Fuel Pools, I was asked by the ACRS to check into the kinds of information given in License Amendments Request (LAR) for decommissioned plants that want relief from safety oversight of their spent fuel pools. I can't seem to locate in the "DRAFT Technical Study....SFP....." any reference or NRC Docket #'s relating to such LARs. Information in this regard would be appreciated.

Thanks.....Gus Cronenberg (ACRS Fellow)
