Re: SCA/Hartley & Hartley Landfill, Bay County, Michigan

Dear Matt and Jack:

Rust E&I is submitting on behalf of SCA Services the "Technical Memorandum: Intrusive (Phase IIB) Investigation, SCA/Hartley & Hartley Landfill". This two-volume report describes the methodology and results of the investigation conducted during September 1995. In addition, a "Work Plan Addendum for Additional Site Characterization and Leachate Treatability Studies, SCA/Hartley & Hartley Landfill" is enclosed for your review and approval. The additional studies outlined in this Work Plan are to be conducted as part of the development and design of a leachate management system for the site and in response to discussions with MDEQ regarding groundwater monitoring results at the site and adjacent properties. SCA and Rust E&I would like to commence this additional field work this summer and would appreciate an expedited review, if possible.

Please call me or Carl Shaw at (708) 574-2006 or Tom Kern at (313) 462-6900 with any questions or comments on the enclosed reports.

Sincerely,

W. Brad Sims

Project Manager
