MEMORANDUM TO: File Center

FROM: David E. LaBarge, Senior Project Manager, Section 1 */RA/*
Project Directorate II
Division of Licensing Project Management
Office of Nuclear Reactor Regulation

SUBJECT: OCONEE NUCLEAR STATION, UNIT 3 RE: CLOSEOUT OF TAC NOS.
RELATED TO REVIEW OF REACTOR VESSEL HEAD BORON
DISCOVERY (TAC NO. MB1258)

By memorandum dated March 5, 2001, the subject TAC number was opened to document oversight activities by the NRC related to the finding of boron on the reactor vessel head at Oconee Nuclear Station, Unit 3. The small amount of boron was found at the base of nine control rod drive mechanisms. Three repair relief requests (TAC Nos. MB1319, MB1572, and MB1600) related to the American Society of Mechanical Engineers Code requirements were processed. Since the repairs and all review activities have been completed, this memorandum closes TAC No. MB1258. Attached are e-mail messages that were transmitted between the licensee and the staff during the review process.

Docket No. 50-287

Attachment: E-mail messages
